

Knauf Byggeprodukter til Svanemærket byggeri

For at få et byggeri Svanemærket skal der anvendes produkter, som opfylder Svanens kriterier.

Disse produkter kan findes i Nordic Ecolabellings Building Materials Database (erstatte bilag 7 og 9). Knauf har en lang række produkter, som er tilmeldt Ecolabels database, herunder byggeplader, specialplader, lim, spartelmasser og pudsprodukter.

At produkterne findes i databasen betyder dog ikke, at produkterne er Svanemærkede, men opfylder kriterierne for at kunne anvendes i Svanemærket byggeri.

Stålprofiler, beslag og skruer er ikke omfattet og derfor ikke registreret i databasen.
