

Attestation

E1-501

Herewith it is confirmed that in the first half of 2022, performed on 27.04.2022, a regular supervision of the product

Birch plywood EN 636-2

plywood, birch, phenolic-formaldehyde (PF), unfaced
in the thickness range: 12 mm ≤ 25 mm

manufactured by

Latvijas Finieris AS
subsidiary company RSEZ SIA "VEREMS"
Lejas Ancupani
LV-4604 Veremu parish
Latvia

was carried out by the approved supervision body (NDS08)

Fraunhofer Institute for Wood Research

Wilhelm-Klauditz-Institut WKI
Bienroder Weg 54E, 38108 Braunschweig, Germany

according to supervision contract no. 501 dated June 12, 2006. It was found that the requirements on personal and equipment are suitable to produce the product in an adequate way and the factory production control meets the requirements of the "Regulation on the classification and external supervision of wood-based panels regarding formaldehyde emission (DIBt - Guideline 100)" dated June 1994. This attestation is part of the evaluation report. The continuous external supervision of factory production control shall take place twice a year.

Dipl.-Ing. Harald Schwab
Head of the Testing, Supervision
and Certifying Body
Braunschweig, June 27, 2022

Attestation

E1-580

Herewith it is confirmed that in the first half of 2022, performed on 26.04.2022, a regular supervision of the product

Birch Plywood EN 636-1

plywood, birch, melamine-urea-formaldehyde (MUF), unfaced
in the thickness range: $> 12 \text{ mm} \leq 25 \text{ mm}$

manufactured by

**A/S Latvijas Finieris
mill "Furniers"
Bauskas iela 59
1004 Riga
Latvia**

was carried out by the approved supervision body (NDS08)

Fraunhofer Institute for Wood Research

Wilhelm-Klauditz-Institut WKI
Bienroder Weg 54E, 38108 Braunschweig, Germany

according to supervision contract no. 580 dated August 20, 2013.
